

EDUCATION

Sept 2024 – Jun 2027 (expected)	M.Eng. in Human-Computer Interaction Tongji University — Shanghai, China Advisor: Prof. Qi Wang · Rank Top 5%
Sept 2020 – Jun 2024	B.Eng. in Industrial Design Engineering Hunan University — Changsha, China GPA 3.75 / 4.00 · Weighted Average 90.2 / 100 · Rank 1 / 94

RESEARCH INTERESTS

Egocentric & Wearable Computing · Multimodal Large Language Models · User Internal State Modeling · Proactive Human-AI Interaction · Computational Fact-Checking

RESEARCH EXPERIENCE

Nov 2025 – Present	EgoX-Interact — Egocentric Interaction Dataset & Foundation Model Tsinghua University, Pi Lab — Beijing, China ● Building a cross-device, cross-scenario, cross-task egocentric interaction dataset with a semi-automated collection, annotation and quality-control platform. ● Training EgoX-Interact, an interaction foundation model for 5+ first-person tasks; preparing open-source release of the dataset and baselines.
Aug 2023 – Oct 2023	Research Assistant — Tactile Display for Blind Users Tsinghua University, Future Lab — Beijing, China ● User research & evaluation. Led interaction design and user-experience evaluation of a tactile display system for blind users; ran in-depth interviews with 50+ visually impaired participants and redesigned the multimodal information-acquisition flow. ● System integration & deployment. Integrated the hardware-software pipeline and drove iterative field testing; the system was built for a China Disabled Persons' Federation (CDPF) affiliate and has since been formally adopted into classrooms for visually impaired students.

APPLIED AI EXPERIENCE

Jul 2026 – Present **AI Strategy Intern — WeChat “Xiaowei” Assistant**
Tencent — Shenzhen, China

- **Instrumentation, intent modelling & online evaluation.** Built the scenario-wide behavioural logging and intent-analysis pipeline for a production conversational assistant spanning 7+ entry points; clustered rollout queries into an intent taxonomy and ran A/B-validated per-scenario experiments with algorithm, client and backend teams.

Feb 2026 – Jun 2026 **AI Strategy Intern — Yuanbao Education**
Tencent — Shenzhen, China

- **Multimodal retrieval & ranking.** Built ranking V3.0 and multimodal retrieval 2.0 for camera-based problem search (94% recall, 97% precision) and governed the retrieval data flywheel.
- **Style alignment via SFT.** Formalized an “ideal solution style” specification and migrated it into the model; co-designed the style-SFT data recipe and P0–P3 evaluation for V5.4/V5.5 (+12pp readability, 95%+ non-P0/P1 pass rate).
- **Agent architecture & LLM-as-Judge.** Designed a multi-agent tutoring architecture (planning → step delivery → blackboard DSL → speech synthesis) with grade-band evaluation sets scored by rubric-augmented LLM-as-Judge.

Jun 2025 – Dec 2025 **Large Multimodal Model Strategy Intern**
ByteDance — Beijing, China

- **Reasoning data & CoT distillation.** Decomposed vision-foundation-model reasoning into sub-capabilities (zoom, counting, region retrieval, OCR) and produced ~9.8K QA items; built a dual-track “o3 distillation + human CoT” pipeline yielding 1,002 human + 1,026 distilled CoT samples for SFT/RL.
- **Video understanding benchmark.** Co-designed **TVB-V3** (46 capability points × 4 reasoning types × 4 difficulty levels, 17.4K questions) with multilingual and highlight subsets (18 languages, 300K+ samples).
- **GUI agent trajectories & reward modelling.** Designed the instruction-asset-subtask-trajectory schema and annotation pipeline for an effects-authoring GUI agent; halved annotation time (14.3 → 7.0 min) via prompt and SOP iteration, delivering ~23K trajectories, 30K preference pairs and a “Visual Clue + Thought + Reward” reward model (step accuracy 82.3 → 91.7%).

May 2022 – Dec 2022 **Research Intern — Computational Interaction & Gesture Modelling**
OPPO — ColorOS Gesture Design Standard — Shenzhen, China

- **Data-driven UX evaluation.** Designed a human-factors study of 11 task chains over 10 core gestures, collecting 10,000+ multi-dimensional data points from 30 participants; combined prototype testing, video analysis and the NASA-TLX scale to diagnose 6 categories of gesture problems.
- **Gesture specification & design optimisation.** Derived discrimination thresholds for key gesture parameters, giving redesign a quantitative basis; produced a unified specification for 10 core gestures via refined motion feedback and visual guidance.
- **Impact.** Results were adopted into the OPPO ColorOS universal design standard, shaping a more consistent interaction experience for hundreds of millions of users.

HONORS & AWARDS

2021 & 2022	National Scholarship	2024	Outstanding Graduate
2022 & 2023	Milan Design Week, First Prize	2023	Huacan Award, Excellence Award

TECHNICAL SKILLS

Programming	Python, Java, JavaScript, SQL
ML / Deep Learning	PyTorch, OpenCV; SFT, LoRA, DPO/RLHF, reward modelling
Agent Frameworks	LangChain, Coze, Dify, ComfyUI, n8n
Research Methods	Benchmark design, data annotation, LLM-as-Judge eval, A/B testing
